## Reference Module - Value Series

The Value Series utilizes Seoul's high performing and cost effective 3528 LEDs to deliver efficacies up to 183 Lm/W at typical driving currents. This solution features uniformity of light and color and enables easy installation with a Zhaga compatible mounting pattern.

## Applications:

## Features:

- High efficacy, long life
- Industry standard mechanical attributes
- Optimized for industry standard power supplies
- 3 SDCM
- ROHS Compliant

## Key Applications:

- Troffer Retrofit
- High Bay
- LED Panel
- Channel

Notes:
[1] Above data tested with constant typical current at $T_{c}=25^{\circ} \mathrm{C}$.
[2] $\Phi_{v}$ is the total luminous flux output measured with an integrated sphere.
[3] Correlated Color Temperature is derived from the CIE 1931 Chromaticity diagram.
[4] To use the module properly, recommend to drive the module by a Constant Current Source (CCS). But the Maximum output voltage of the CCS should be limited by referring this sheet.

## Notes:

*Colors fully compliant with the CIE requested color temperatures on the following table:

| Correlated Color Temperature | Nominal CCT | CCT (K) |
| :---: | :---: | :---: |
| C | 5000 K | $5028 \pm 283$ |
| E | 4000 K | $3985 \pm 275$ |
| G | 3500 K | $3465 \pm 245$ |
|  | 3000 K | $3045 \pm 175$ |

## Illustration: How to predict components temperature

*Recommended Tc Testing point

## Notes:

[1] All guarantee are based on the Absolute Maximum Ratings listed.
[2] Please use a Constant Current Source (CCS) to drive the module, the typical $V_{F}$ of module is $34.2 V_{D C}$ and $V_{F-M A x}$ is $35.4 V_{D C}$ respectively.
[3] Operating temperature was tested at the assigned Tc point on the PCB.
[4] To ensure the module works properly, $T_{c}$ should refer to "Absolute Maximum Operating Specification".

## Storage before use

1. When storing devices for a long period of time before usage, please following these guidelines.

- The devices should be stored in the anti-static bag that it was shipped in from Seoul-Semiconductor with opening
- If the anti-static bag has been opened, re-seal preventing air and moisture from being present in the bag

## SEOUL

## SEOUL SEMICONDUCTOR

## Company Information

Seoul Semiconductor (SeoulSemicon.com) manufacturers and packages a wide selection of light emitting diodes (LEDs) for the automotice, general illumination/ lighting, appliance, signage and back lighting markets. The company is the world's fifth largest LED supplier, holding more than 10,000 patents globally, while offering a wide range of LED technology and production capacity in areas such as "nPola", deep UV LEDs, "Acrich", the world's first commercially produced AC LED, and "Acrich MJT - Multi-Junction Technology", a proprietary family of high-voltage LEDs. The company's broad product portfolio includes a wide array of package and device choices such as Acrich, high-brightness LEDs, mid-power LEDs, side-view LEDs, through-hole type LED lamps, custom displays, and sensors. The company is vertically integrated from epitaxial growth and chip manufacture in it's fully owned subsidary, Seoul Viosys, through packaged LEDs and LED modules in three Seoul Semiconductor manufacturing facilities. Seoul Viosys also manufactures a wide range of unique deep-UV wavelength devices.
