NEUMÜLLER

ELEKTRONIK GMBH

A STRONG TEAM

Work together. Grow together.

Neumüller Elektronik
Technology that connects

For many years, Neumüller Elektronik has stood for reliable solutions involving electronic and electro-mechanical components. As a medium-sized company, we combine technical expertise with a personal approach to working together – with our customers, partners and manufacturers.

Our range of services extends from the distribution of selected electronic and electromechanical products to the **development** of our own solutions and their **production**. In doing so, we work closely with renowned manufacturers and customers across a wide range of industries.

Our portfolio is diverse: from connectors, switches and push buttons to displays and LEDs, as well as signal technology, cables and other electronic components. Depending on the requirements, we support our customers not only in selecting suitable products, but also in developing individual solutions.

Find out more about our products and services in our line card and on our website.

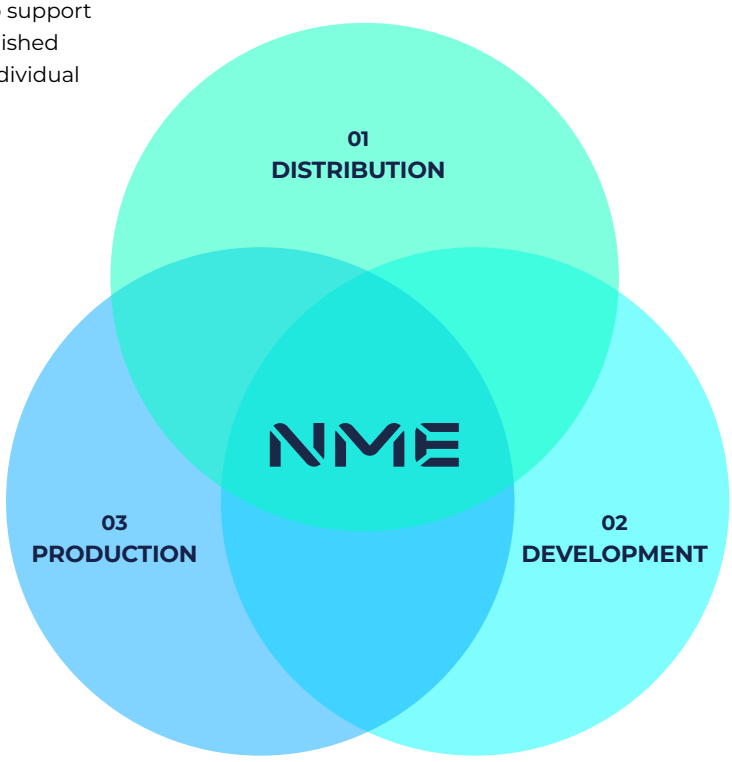

Everything that belongs together
Three areas. Many opportunities

At Neumüller Elektronik, distribution, development and production complement one another. This enables us to support our customers from the initial idea through to the finished solution – with expertise, technical know-how and individual options.

01 DISTRIBUTION
Professional advice & technical expertise

02 DEVELOPMENT
Modifications & customer-specific developments

03 PRODUCTION
Electronics manufacturing & system assembly from a single source

Working at Neumüller Elektronik

Personal, not anonymous

At Neumüller, experienced specialists, ambitious career starters and career changers come together in a family-like environment with big ideas. With around 70 employees across Germany and short decision-making processes, people know one another personally and are in regular direct contact.

We are a company where communication is direct and decisions do not have to pass through several levels of hierarchy. Interaction between colleagues, managers and the management team is simply part of everyday working life for us.

What matters most to us is that good work is not based on specialist knowledge alone. It happens above all when people talk to one another, exchange ideas and work together to find solutions.

MANY TASKS. ONE STRONG TEAM.

Our different departments – including Purchasing, Sales, Product Marketing, Production and Warehousing – work closely together. Responsibilities overlap and new topics emerge. As a result, roles may change or overlap over time, and entirely new areas of responsibility may develop.

We do not expect everyone to be able to do everything. But we value people who are curious, think ahead and are willing to look beyond their own area of responsibility and improve established processes.

Professional qualifications are important – but they are not always the deciding factor. It is just as important to us that someone is a good personal fit for our team, is open to new topics and is willing to try new approaches.

Good ideas do not always come from where they were originally expected. That is why we take suggestions for improvement seriously and give our employees the space to contribute their own ideas.

Together
in the daily work routine and beyond

A good team spirit is built not only through day-to-day collaboration. Often, it is the little moments in between that make all the difference.

We often spend our lunch breaks together. We cook, eat and catch up. And when the weather is good or there is a special occasion, the barbecue is sometimes fired up, too.

Alongside our everyday work, we organise smaller shared activities and team events throughout the year. Once a year, all colleagues also come together for a company-wide event.

Of course, this is not the reason people work here. But it is part of the personal, family-like atmosphere that makes Neumüller Elektronik what it is.

Work that fits your life

Individual solutions for everyday working life

Work and private life do not always fit into a fixed model. That is why we try to find solutions that suit the role, the individual situation and the needs of the business.

Depending on the position, we offer different options such as flexible working hours, the possibility of working remotely and other smaller arrangements that can be tailored to individual needs.

At the same time, we always make sure that tasks and departments where fixed availability and working together on site play an important role continue to be reliably covered.

But not every life situation fits into a fixed model. We work together to find individual solutions that work for everyone involved.

Our aim is to create flexibility wherever it makes sense and is possible – while keeping teamwork and a smoothly running working day in mind.

MORE THAN JUST A JOB

From flexible benefits to memorable team events – people are at the heart of everything we do.

- More exercise
- Flexible working arrangements
- Comfortable working environment
- Cooking together every day
- Health checks & preventive care
- Mental health & relaxation
- Ergonomic workstations
- Sports & team spirit
- Healthy working
- Healthy eating
- Company bike-leasing
- Breaks with a high score

We value long-term collaboration

WORK TOGETHER.
STAY TOGETHER.

Long-term collaboration is highly valued at Neumüller Elektronik. Many of our colleagues have been part of the company for more than ten years – some for 15, 20 or even 25 years.

Milestones like these do not happen overnight. They stand for experience, trust and working relationships that have grown over many years.

At the same time, we are always happy to welcome new colleagues, new perspectives and new ideas. A team never stands still – it continues to develop, just like the tasks and challenges we face every day.

What goes into our solutions

Diverse. Technical. Part of everyday life

Many of the things we encounter every day only work because a wide range of electronic components interact. Neumüller solutions can play a part in this, too – often inconspicuously, which is exactly why they are not immediately recognisable.

For us, this means that every application brings new requirements and new tasks. Here, we show just a small selection to give you an impression of the wide range of topics our teams work on.

Aerospace
Electronic components that operate reliably, even under the most extreme conditions

Cooking robot
Displays, control electronics and power supply for automated processes

Positioning laser systems
Optical sensors and control systems for precise positioning

Pressure-room measurement and analysis
Electronics for pressure measurement and monitoring

Bottle-return machine
Sensors, displays and control electronics for automated bottle-return processes

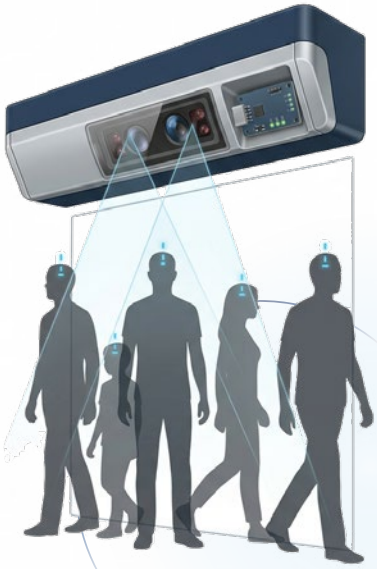

Coating-thickness measurement
Sensors for precise measurements

Document verification system
UV LEDs, sensors and electronic components for reliable document verification

Design-in is our passion.

We love electronics.

Passenger counting
Sensors and electronic components for capturing and processing movement data

Surgical light
LED technology and suitable power supplies for precise illumination

Dermatoscope
LED technology and displays for precise skin analysis.

Record player
Electronics for precise audio playback.

Logistics vehicles
Signal technology and power supplies for vehicles and industrial applications.

Laboratory sample sorter
Sensors and control systems for automated processes

Wet vacuum cleaner with air-filtration function
Electronics for motor and filter control

Magnetic stirrer
Control system for consistent stirring movements.

Car park monitoring
Sensors for detecting space occupancy.

Fitness equipment
Displays, power supply and electronic control systems for modern training equipment.

THESE ARE JUST A FEW OF THE MANY INTERESTING APPLICATIONS

in which our solutions are used.

There is no one-size-fits-all solution. Sometimes a single component is needed, sometimes a complete solution. And sometimes it is a small modification to a component that makes all the difference and ensures that a solution is just right for the application.

Recognising these opportunities and turning them into reality together is part of our everyday work. Because good solutions are not always about the big picture – sometimes the crucial idea lies in one small detail.

Making things happen together

Discover your opportunities with us

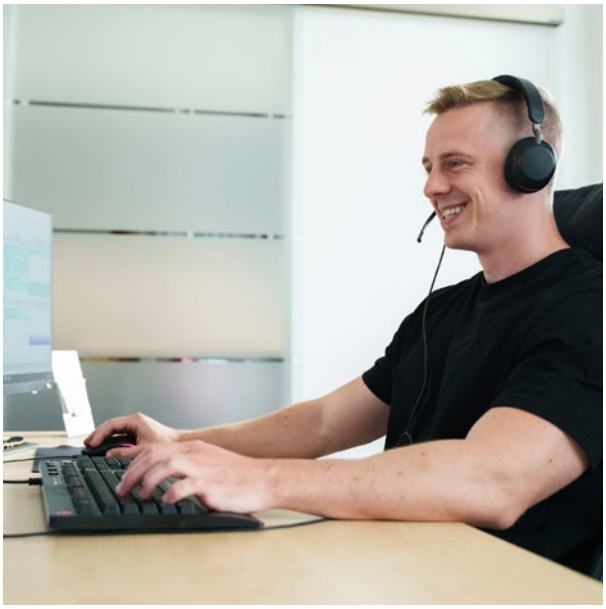

SALES

Understanding technology. Advising customers. Finding solutions.

Sales at Neumüller is about much more than selling products. Our focus is on our customers, their requirements and finding the solution that is right for them. After all, an off-the-shelf product is often not quite the right fit; small individual modifications may be needed to make it work in the customer's system.

A good understanding of our products and technical topics is just as important as direct communication with customers and colleagues.

The work is varied and constantly brings new topics and challenges. If you enjoy communicating, understanding how things fit together and working with others to find suitable solutions, you will find a varied working environment with us.

NEW BUSINESS DEVELOPMENT

Thinking ahead and actively shaping markets

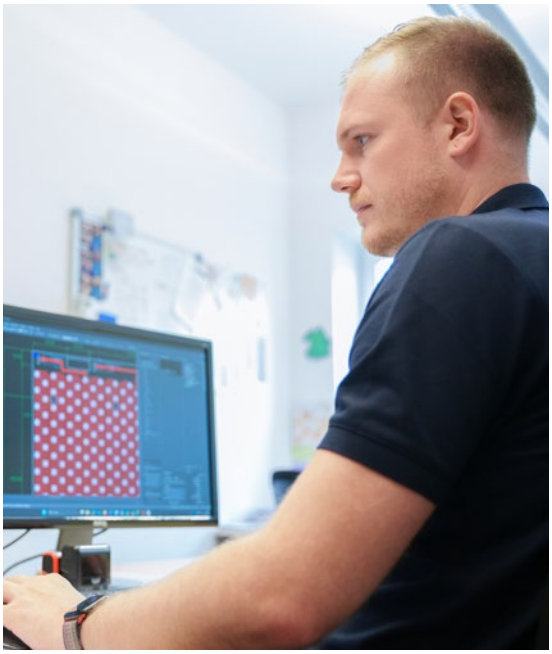

Markets change, customer needs evolve and new opportunities emerge. To respond to these developments, we explore new business areas, developments and potential.

We analyse customer needs and market changes, develop new ideas and concepts, and provide targeted impetus for the continued development of our company.

From the initial idea through to successful implementation, the aim is to identify new opportunities, think beyond the obvious and work together to turn them into concrete solutions.

If you think strategically, recognise connections and enjoy exploring new paths, you may have the opportunity to play an active role in shaping these topics.

PRODUKTMARKETING

Understanding products. Connecting markets. Shaping communication.

Product Marketing brings together technical topics, communication and collaboration.

Our Product Managers develop an in-depth understanding of our manufacturers' products and solutions. They are in direct contact with national and international partners, prepare product information and work with Sales to lay the foundations for successfully marketing our products and solutions.

Close cooperation with our Sales team and our customers is just as much a part of everyday work as keeping up with new products, technological developments and current market requirements.

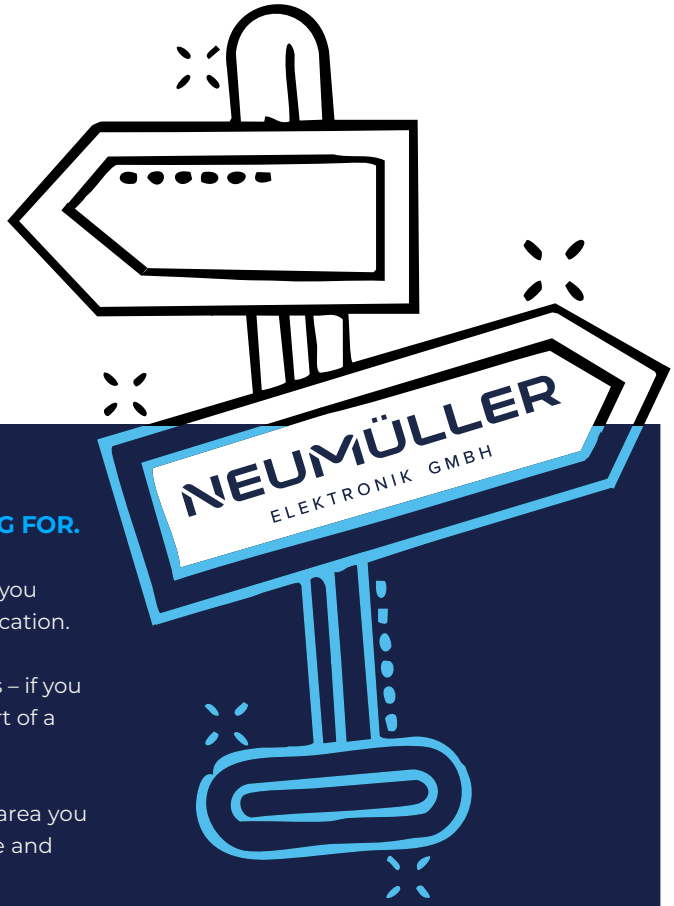

If you enjoy thinking beyond the obvious, recognising technical possibilities and actively helping to shape new applications, you will find a varied and diverse role here.

Still have questions?

Some things are best clarified in a personal conversation.

MAYBE YOU ARE JUST THE PERSON WE ARE LOOKING FOR.

Even if there is no suitable vacancy at the moment, if you feel you could be a good fit for us, convince us with a speculative application.

Whether your background is commercial, technical or in Sales – if you enjoy taking responsibility, thinking ahead and working as part of a team, we look forward to hearing more about you.

Send us your speculative application and let us know which area you would like to work in. Together, we will see where your profile and experience could best fit at Neumüller Elektronik.

Many paths lead to us

There is no single route

Some of our colleagues already have many years of professional experience. Others are starting their careers after completing vocational training or university. And sometimes a new path begins with a career change.

Experienced professionals

Would you like to contribute your experience and expertise, take on new responsibilities and work with others to develop solutions? Then you will find a varied working environment with us, with short lines of communication and room for new ideas.

Career starters

Starting your career brings many new tasks and experiences. With us, you have the opportunity to familiarise yourself with your role step by step and find your own place in the company.

Career changers

Not every career path is straightforward – and it does not have to be. If you are open to new topics, have an interest in technology and are willing to learn new tasks, we look forward to getting to know you.

Show us who you are and what strengths you bring to the table. Together, we will explore where your experience and skills could be put to best use at Neumüller Elektronik – even if there is no suitable vacancy at the moment.

Take the next step in your career and bring your perspective, experience and passion to a strong team.

Apply on your own initiative

At Neumüller Elektronik, we grow with new technologies, exciting projects and a strong team. Even without a matching job posting, we are interested in personalities who share our passion for electronic components, customised solutions and reliable partnerships. Whether in a commercial, technical or sales role – if you enjoy taking responsibility and working in a structured team, you have come to the right place. Send us your unsolicited application including your preferred area of deployment, and we will assess where your profile fits best at Neumüller Elektronik.

If you have the ambition to make a difference in a dynamic, future-oriented company, please read our Privacy Information for Applicants beforehand and then send us your complete application documents including your salary expectation and possible start date. We look forward to your application!

Apprenticeship at Neumüller

Your start to the future

Starting an apprenticeship at Neumüller Elektronik marks the beginning of a new chapter in your life – and you will be right in the middle of things from day one. Instead of just watching, you will gradually get to know different tasks and processes and apply what you learn in practice. You will have dedicated contacts who support you in your area of responsibility.

What matters to me: People take the time to answer my questions, and I am trusted with responsibility – even while I am still an apprentice.

AND WHAT HAPPENS NEXT?
Many of our apprentices stay with Neumüller Elektronik after completing their training and continue to develop as their responsibilities grow.

The opportunities that follow depend entirely on your interests, strengths and the tasks involved.
