Taiwan Oasis

Taiwan Oasis Technology Co., Ltd., was established in 1974. With 4 decades of experiences in the field of LED technology, Taiwan Oasis represents a stable partner for your requirements regarding product and application. With the corporate philosophy of "simplicity, integrity, reliability, precision, progress and innovation", it was committed to production, research and development in light emitting diode and LED related components.

With manufacturing plants in Taiwan and China you will receive high quality products due to the installed quality management system (ISO 9001:2008). The ISO/TS 16949 qualification positions Taiwan Oasis also as a partner for the automotive industry. High Quality products with reasonable prices lead to the motto: "Bright Ideas, Bright Solutions."

Today, Taiwan Oasis has become a leading indicator in the industry with its complete product lines, worldwide sales network and professional technology and quality service. In combination with Neumüller's logistic concept, you will have two strong partners on your side. We are looking forward to having a mutual fruitful future.
